OBJECTIVE

To utilize my machine learning and AI skills in an organization focused on AI-driven analytics and decision-making. Eager to learn new technologies and contribute to innovative, real-world projects.

EDUCATION

Master of Computer Applications (MCA)

Lead College of Management (Autonomous), University of Calicut | 2024 – Present

- Relevant Courses: Python, React, Java, Generative AI, NLP, Prompt Engineering

Bachelor of Science in Computer Science

University of Calicut | 2021 – 2024

- Project: *Quick Serve* – A PHP-MySQL-based platform for booking local workers (plumbers, electricians).
- Achievement: Served as NCC Leader (Senior Division)

INTERNSHIP EXPERIENCE

Data Science Intern

AcmeGrade (Remote) | Sept 2023 – Nov 2023

- Applied data preprocessing and exploratory data analysis techniques using Python.
- Implemented basic machine learning algorithms on real-world datasets.
- Gained hands-on experience in foundational data science workflows and tools

AI-ML Intern

GJ Global IT Ventures (Onsite) | Sep 2025 – April 2026

- Applied LLMs, NLP techniques, and scalable backend architectures to design and integrate real-world AI workflows.
- Working on production-grade AI systems including a RAG-based PDF study assistant, AI-powered journalism Platform, Recruitment Management system for HR

PROJECT EXPERIENCE

RAG Study Assistant – AI-Powered PDF Learning Platform

- Built an AI-powered study assistant that ingests PDF documents, extracts content, and enables contextual question-answering using RAG pipelines
- Integrated FastAPI, HuggingFace embeddings, ChromaDB vector search, and Groq LLM for semantic retrieval and accurate PDF-based explanations
- Developed an end-to-end learning tool with subject-based PDF system, real-time querying, scalable backend, and clean web interface

AI Recruitment Management System For HR

- Built an AI-powered recruitment platform that receives resumes via IMAP email, parses profiles, and matches jobs automatically
- Integrated NLP ranking, resume parsing, and PostgreSQL storage for automated screening, scoring, shortlisting, and longlisting
- Developed as an end-to-end HR tool with dashboards, analytics, reports, automation

CRM Lead Management & AI Demo Booking Automation

- Built an end-to-end sales automation workflow triggered by Zoho CRM new lead events: WhatsApp AI chatbot qualifies leads, checks Google Calendar, and books demo slots automatically
- Integrated LLM chatbot to collect structured lead data (company, employees, decision-maker, pain points) and route to email confirmations for both customer and sales team
- Connected REST APIs, webhooks, CRM triggers, and email nodes in a multi-step pipeline with PostgreSQL for lead data storage

EduAssist – AI Powered Educational Management system

- Developed an AI-Powered Platform for automated assignment evaluation and personalized student feedback
- Integrated OCR and LLM technologies to analyze handwritten/digital answer sheets and generate accurate Score
- Utilized FastAPI, SQLite, ChromaDB, OCR, and Groq LLM to enable automated grading and feedback generation
- Implemented AI-Powered Quiz generation, Flashcard creation, Grammer Bot , Doubt clearing assistance to enhance student learning

CERTIFICATIONS

- Android App Development Using Flutter – Srishti Innovative, Trivandrum
- Python Programming – Kaggle Certification
- Claude 101 Certification
- NCC ‘C’ Certificate – Senior Division, National Cadet Corps

TECHNICAL & SOFT SKILLS

- Programming: Python
- Web Development: FastAPI, Flask
- Database: MySQL,PostgreSQL,ChromaDB
- AI / LLM Integration: RAG, Groq, Openai API, Prompt Engineering, Langchain ,
- Frameworks & Libraries: Langchain, OpenAI, spaCy ,OpenCV, TensorFlow Lite, YOLOv8, Scikitlearn, Huggingface
- Automation & Workflow Tools: n8n, Zapier,Make.com
- Soft Skills – Communication, Leadership, Time Management, Adaptability, Collaboration, Flexibility

LANGUAGES

- English
- Malayalam (Native)
- Hindi (Basic)
- Tamil (Basic)
